Sto. Tomas de Villanueva Parochial School takes another step towards improving classroom instruction as the school provides 6 brand new laptops for teachers. The laptops were loaned to teachers to be used for their research and presentations. It also hopes to maximize the use of additional LCD projectors purchased prior to the opening of the school year. Rev. Fr. Orlando B. Cantillon wanted the teachers to become a breast on the use of new technology in order to make the learning activity more interesting and effective. Last July 4, 2014, the school director took the initiative to include in his monthly formation to school personnel the practical application of power point presentations in instruction. Two speakers were also purchased intended for

audio-video presentations. The 6 school personnel and the entire school community were thankful to the director in providing this rare opportunity and the finance personnel in funding the equipments for teaching innovation.
